

DESIGN SYSTEM & STYLE GUIDE

Netflix UX Redesign

Academic UX case study — design system, grids & accessibility

Brand Overview

This is an academic UX redesign case study of the Netflix mobile app, built to demonstrate a complete research-to-style-guide design pipeline: user research and personas informed card-sorted information architecture, which shaped three core user journeys, which were sketched as low-fidelity wireframes, then formalized into this design system and rendered as high-fidelity mockups.

Design Objective

Reduce the time and friction between opening the app and starting to watch — directly targeting the “choice overload” and “long browsing time” pain points surfaced in the earlier research phase, most concretely through the SmartPick feature.

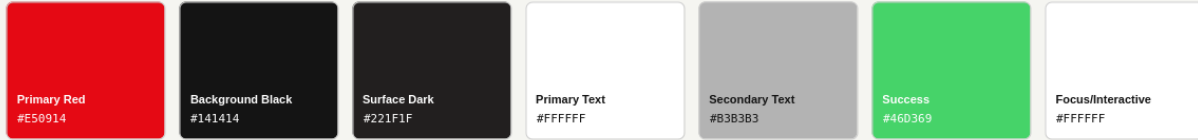

Data Disclosure

The research, personas, and card-sorting evidence behind these design decisions are synthesized example data for this exercise, not results from a live study — see [Research/Research_Objectives.md](#) for full disclosure.

Color System

Primary palette, text colors, and state colors used across every screen.

Color Palette

Typography

Primary font: Inter. Alternative: Arial / Helvetica.

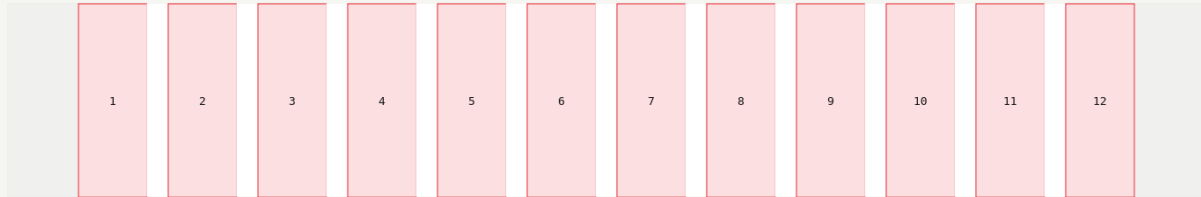

Typography Scale <i>Primary: Inter · Alternative: Arial / Helvetica</i>	
Aa Display	Desktop 48px · Mobile 32px · Bold
Aa H1	Desktop 36px · Mobile 28px · Bold
Aa H2	Desktop 28px · Mobile 24px · Semi-Bold
Aa H3	Desktop 22px · Mobile 20px · Semi-Bold
Aa Body Large	Desktop 18px · Mobile 16px · Regular
Aa Body	Desktop 16px · Mobile 14px · Regular
Aa Caption	Desktop 14px · Mobile 12px · Regular
Aa Button	Desktop 16px · Mobile 16px · Medium

Desktop Grid — 12 Columns

Frame: 1440×1024 · Margin: 80px · Gutter: 24px · Type: Stretch

Desktop Grid — 12 Columns

Frame: 1440 × 1024 · Margin: 80px · Gutter: 24px · Type: Stretch

Figma setup: Frame 1440×1024 → Layout Grid → Columns → Count: 12, Margin: 80, Gutter: 24, Type: Stretch

Usage examples:

- Hero banner: cols 1-12 (full width)
- Content row (5 cards): cols 1-12, cards span ~2.3 cols each with gutter
- Title detail: poster cols 1-4, info panel cols 5-12

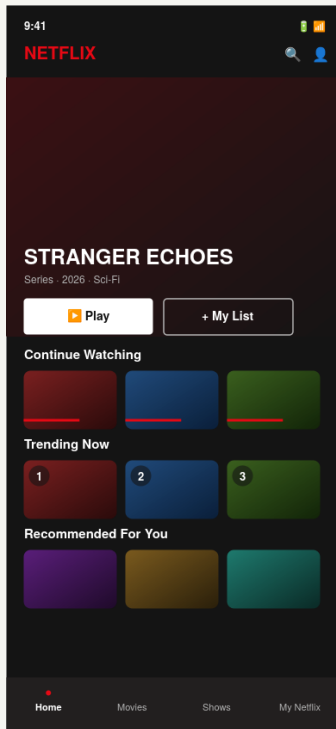

Mobile Grid — 4 Columns

Frame: 390×844 · Margin: 16px · Gutter: 16px · Type: Stretch

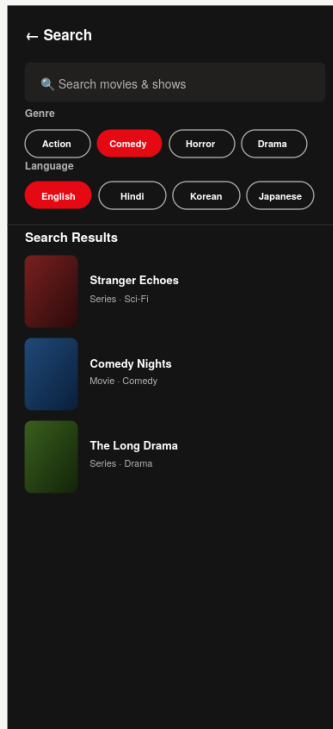

UI Components

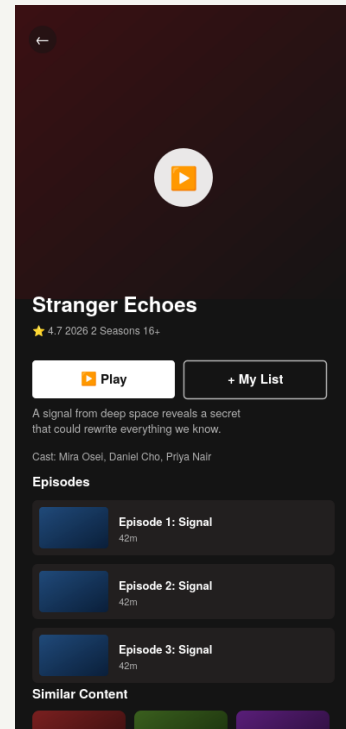

Core components: primary/secondary buttons, search field, movie card, navigation item, filter chip — shown here in the five high-fidelity screens that use them.

Accessibility

WCAG 2.1 contrast verification for every important color combination — computed, not estimated.

WCAG Contrast Verification

Combination	Preview	Foreground	Background	Ratio	Result
Main text		#FFFFFF	#141414	18.42:1	
Button text		#FFFFFF	#E50914	4.79:1	
Secondary text		#B3B3B3	#141414	8.79:1	
Light surfaces		#141414	#FFFFFF	18.42:1	
Card/nav text on Surface Dark		#FFFFFF	#221F1F	16.36:1	
Secondary text on Surface Dark		#B3B3B3	#221F1F	7.8:1	
Success badge text		#FFFFFF	#46D369	1.95:1	
Red text on black (nav/labels, normal)		#E50914	#141414	3.84:1	
Red text on black (large, e.g. logo)		#E50914	#141414	3.84:1 (L)	

2 of 9 combinations failed and were resolved: white text on the Success green badge switched to black text (9.46:1, AAA); red text on black restricted to large/bold sizes only, with active-nav state redesigned to use a white label + red dot indicator instead of red text. Full detail: [Accessibility/WCAG_Contrast.md](#).
